### Letter of Request

Dear Mr. Sybiha,

We sincerely appreciate the continued cooperation and invaluable support provided in strengthening medical care for Ukrainian personnel. The All-Ukrainian Public Organization "All-Ukrainian Resuscitation Council and Emergency Medicine" (ARCEM) remains committed to advancing the quality of emergency medical training and equipping combat medics and military personnel with the most effective life-saving tools.

Given our extensive experience in Tactical Combat Casualty Care (TCCC) training at the 184th Training Center of the National Academy of Land Forces of Ukraine, we continuously work to integrate advanced medical solutions that can significantly improve survival rates on the battlefield.

In this regard, we respectfully request the assistance of the Ministry of Foreign Affairs of Ukraine in facilitating the provision of additional medical devices and trauma-care solutions that would substantially enhance our training capabilities and improve the effectiveness of care delivered in real-world combat situations.

We would greatly appreciate support in obtaining the following medical products:

- XSTAT Trainer Facilitator Kit (TRN-99L), NSN Pending – 10 kits
- AAJT-S (AAJT-S-001), NSN# 6515-01-695-4457 – 1000 devices
- XSTAT P15 (FIN-0018-21) NSN# 6510-01-655-5192 – 5000 devices

The integration of these devices into our training programmes will ensure that Ukrainian military medics receive hands-on experience with modern, field-proven medical solutions, ultimately contributing to improved outcomes in combat casualty care. Furthermore, we are committed to systematically collecting and providing operational feedback on their practical use and effectiveness.

We appreciate the Ministry's continued support in strengthening Ukraine's emergency medical care capabilities and stand ready to provide any additional information required.
